## Experience

- Web Developer (Part-time) Remote Present
- Industrial Training : **Doing industrial Training on MERN Stack.**
  - Project Course : Helped people to build their websites and fixing Bugs.
  - Impact : Worked on different projects front-end and back-end.

## Projects

- Medical Proforma (Full Stack):** Medical professionals and aspiring students at Homeopathy Medical College have traditionally relied on paper-based case-taking. However, through the integration of our innovative website, this practice has undergone a remarkable transformation. Now, practitioners can seamlessly complete patient forms on this website from any location. This website is developed with the use of **HTML, CSS, Javascript, EJS, Express Js, mongoose.**
- Movie Search Application:** A fully mobile responsive well-designed layout and best application for entertainment. Users can see movies and TV shows daily basis and a single page shows casts and all the important details about the show, also users can see the trailer of the particular show. **Tech: Node Js, React Js, Redux, Redux toolkit, Global State Management, Error Handling, Git, and vercel(for hosting).** (March 2023)
- Crypto Tracker App:** Used an API to get all the information about the coins and prices, user can select the coin and see the current market price and all other info about the coin. **Tech: React Js, Git, Vercel(for hosting), API call, Http.(Dec 2022)**
- Question Paper portal:** The website contains all the previous year's question papers and includes an admin view from where you can upload the question pdf. **Tech: HTML, PHP, SQL, JavaScript, CSS.** This is a real-world project, I worked on the UI part only (Feb 2023)
- Weather App - Weather Website:** Used an API(OpenWeather API) to get weather information for a specific location, the user can select the location. **Tech: HTML, CSS, JavaScript, Git, NodeJS, ExpressJS, API call, Http.** (Jul 2022)
